Bio

As an IT professional with two years of experience as a Level 1 technician in a specialized IT department within the UAB system, I've honed my technical and interpersonal skills, excelling in customer support, troubleshooting, and effective communication. I'm eager to embrace a new role with expanded responsibilities to further apply my expertise and cultivate new skills.

Experience

Information Systems Specialist I

UAB Facilities Division Information Technology
2021 - Present

- User Services role in UAB's largest division, spanning Campus and Hospital, supporting over 700 users with unique hardware and software requirements.
- Configure and deploy Windows-based Dell and Microsoft workstations using SCCM OSD tool. Develop PowerShell scripts to automate configuration for user workstations, kiosks, and digital signage.
- Develop PowerShell scripts to assist with AD cleanup, searching and modifying fields within user accounts and computer objects.
- Investigate identified vulnerabilities in Tenable.io, locate and patch machines using PowerShell scripts, asset management software, RSAT tools, and internal UAB sysadmin tools.
